Timber Rafts for Japan.

Vancouver, B. C., Feb. 8.—James Robertson, proprietor of the patent timber rafts that have several times been towed from Puget sound to San Francisco, intends early next summer to send a big raft to Japan. Robertson is now in China, having been there for a couple of months, and writes to Captain Gates, a ship man of this city, that there will be a fairly good market in several Oriental ports for shipments of timber that can be sent cheaply across the Pacific. Although the tow is a very long one, he is entirely satisfied that the proposal of sending across in tow of a steamer a raft containing from twelve to twenty-five million feet is a feasible one. A sawmill will probably be built near Yokohama to cut up the logs.

Hatching Rat Blocks.

Editor Evening Bulletin:—On Saturday the 17th inst., the sub-inspector of our district left four blocks containing poison for the destruction of rats. My wife placed it under the house as a secure place until I returned to distribute it. We happen to have an old red hen which had been setting for two weeks on three telephone insulators and a cold cream bottle. Espying the four blocks, she instantly took possession of them and has kept it rigidly ever since. Last night I took her temperature and found it to be 105, as this is two degrees in excess of an ordinary setting hen I am fully convinced that she will hatch the blocks in less than the prescribed twenty-one days.

This morning I have added a tin of water so that the hatching of said blocks will not be interfered with.
